FIRE BASKETS

Important notes about fire baskets:

Polished fronts in cast iron/steel refer to finials, fret and legs.

All fire baskets are made from high quality, natural finish (not lacquered) metals such as polished brass and polished steel. These may tarnish or exhibit signs of rusting over time, during both storage and subsequent use. Gazco recommend, therefore, that your basket is polished after installation and at regular intervals using suitable metal cleaners.

Most baskets are hand-built to order. Please check with Gazco for up to date delivery schedules.

Important notes about gas options:

All baskets fitted with gas fires should be installed to BS5871.3 with an adequate flue to clear the opening.

Gas fires for fire baskets are DFE (Decorative Fuel Effect) appliances, with a gas input of up to 15kW and an efficiency of around 20%.

These fires require a Class 1 flue with a **minimum** diameter of 7" (180mm), but may require a larger flue depending on the fireplace opening size.

Gas fires are supplied as standard as manual control, which can be upgraded to the Standard (GAZ8455) remote control.

Please check the price list for details of the position of the manual controls on the appliance.
